 OPIS

Kramer's BC-UNIKAT cable is a unified CAT6a cable that handles all Pro AV and IT signals. Over four individually screened twisted pairs, this U/FTP CAT6A cable runs Kramer's DGKat™ technology, 4K HDBaseT™ technology or LAN applications and ensures optimal signal performance.

- Quality Construction — 4 shielded twisted pairs (U/FTP) of 23AWG solid copper conductors are cabled together in an unshielded outer jacket.
- Optimized for Kramer Hardware — Use with any of Kramer's wide range of twisted pair digital transmitter-receiver sets. Terminate with shielded transmitter-receiver sets (DGKat™ and HDBaseT) and shielded RJ-45 connectors.
- HDBaseT Recommended — [www.hdbaset.org/hdbaset-recommended-cables/](http://www.hdbaset.org/hdbaset-recommended-cables/).
- Reaction to Fire Classification — Dca-s2,d1,a1 (optional: B2ca-s1,d1,a1).
- RJ-45 Connector — The larger diameter 23AWG twisted pair cable requires a suited RJ-45 connector. Use the K-LAN CON-RJ45-3.
- Length — 100 m

**Applications**

- Structure cabling for horizontal and building backbone cable.
- IT, LAN, HDBaseT and Ethernet installations.
- Ideal for 10GbE and legacy speed applications.
- IEEE 802.3af, IEEE 802.3at and IEEE 802.3bt.
