# NovoStage is the Windows™ based wireless collaboration software for content sharing.

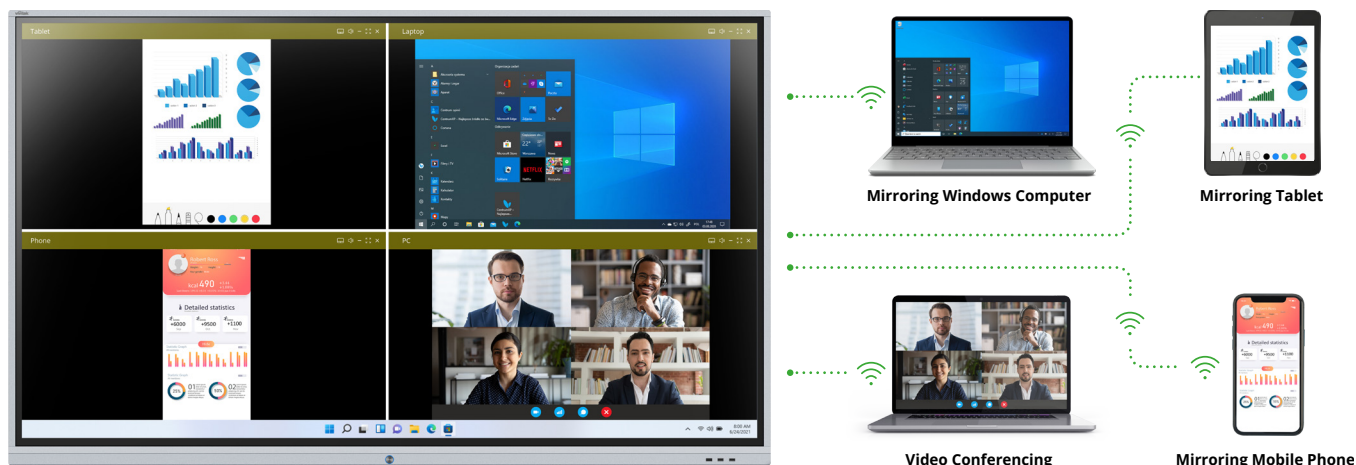

With NovoStage software you can upgrade any Windows™ based display into a wireless collaboration platform. The software can receive content from any device or operating systems and display 4 participants to the main screen simultaneously. Ideal for information and idea sharing in meetings, lessons and training sessions, the NovoStage eliminates the hardware setup and will transform any Windows Display into a collaboration solution with just a simple software install.

NovoStage functions and features

- Wireless content sharing from laptop and mobile devices
- Up to four participants can be connected simultaneously
- Floating screen with quick layouts
- Instant 4K screen mirroring
- Connections through NovoConnect App, Software, web portal or Airplay®
- Easy connection to the session with meeting ID, QR Code, nearby devices, room name or IP address
- The moderator feature allows control of the meeting
- Video conferencing with popular Apps
- Facilitates collaboration with a complete suite of functionalities, such as sending screenshots and file sharing via NovoConnect App/Software
- AES-256 encryption, and compliant with - ISO 27001 international standard
